Claims 1-10 and 81-90 are deemed allowable over the prior art of record, the reasons for allowance are as follows:

In regards to claim 1 the prior art of record does not disclose nor preclude a signal processing apparatus which can output a brightness signal and a color signal, comprising: a first gamma converting circuit which performs first gamma conversion to the color signal; a second gamma converting circuit which performs second gamma conversion to the brightness signal, a characteristic of the second gamma conversion being different from a characteristic of the first gamma conversion; and a bit adjustment circuit which adjusts the number of bits of the color signal gamma-converted by said first gamma converting circuit.

Examiner notes that the closest art of record is USPN 5,345,265 to Kim discloses all of the claim limitations as illustrated in Figs. 3 and 4 except that the second gamma conversion circuit does not have a characteristic of the second gamma conversion being different from a characteristic of the first gamma conversion. While it is known in the art to provide different characteristics to gamma conversion circuits on different color channels as disclosed in USPN 5,404,165 to Ohtsubo et al. there does not appear to be any suggestion or motivation in the prior art of record to provide different characteristics to gamma conversion circuits for the luminance and chrominance signals.

Claims 2-5 and 81-85 depend from claim 1.

Claim 6 is a method claim corresponding to the apparatus of claim 1 wherein the reasons for allowance are substantially similar to that provided above for claim 1.

Claims 7-10 and 86-90 depend from claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian C. Genco who can be reached by phone at 703-305-7881 or by fax at 703-746-8325. The examiner can normally be reached on Monday thru Friday 8:30am to 4:30 pm.
